Abstract: ...XML data, then efficient data exchange between client and server is a key problem to be solved. However, a solution should also consider client-side **cache** management for the XML data, synchronisation of concurrent access to the XML data, and lost connections during transaction execution. In order to **reduce** data exchange between client and server, our protocol reuses data stored in the client's memory instead of reloading data into the client's memory...

Record Type: Product Analysis

Revision Date: 20070300

XML compression techniques to overcome Services-Oriented Architecture (SOA) performance issues focus on **XML** hardware, **compact** representation, **XML cache** or parsers, software **compression** and binary **XML** standards. **XML** has become the basis for all Web Services standards. XML-based representations perform data interchange between service providers and requestors SOA. Various programs across numerous...

NTIS Prices: PC A09/MF A01

Four digital computer programs, XTALK, XTALK2, FLATPAK, FLATPAK2, for determining the electromagnetic coupling within an (n+1) conductor, uniform transmission line are presented. Sinusoidal steady state behavior of the line as well as the TEM or 'quasi-TEM' mode of propagation are assumed. XTALK and XTALK2 consider lines consisting of n wires (cylindrical conductors) and a reference conductor. The surrounding medium is homogeneous and lossless. XTALK assumes that all (n+1) conductors are perfect conductors whereas XTALK2 considers the conductors to be lossy. There are three choices for the reference conductor...

Identifiers: Flatpack cables; XTALK computer program; XTALK2 computer program; FLATPAK computer program; FLATPAK2 computer program; NTISDODXA

Ein modellbasiertes Expertensystem zur Analyse und Reduzierung des Uebersprechens auf elektronischen Baugruppen

(A model based expert system for the analysis and reduction of crosstalk on printed circuits)

Benz, T

Univ. Karlsruhe, D

Fortschrittberichte VDI, vReihe 21, n129, pp1-136 , 1993

Document type: Report **Language:** German

Record type: Abstract

Abstract:

Die auf gedruckten Leiterplatten durch Uebersprechen (engl: crosstalk) hervorgerufenen Stoerspannungen fuehren vermehrt zu Funktionsstoerungen moderner elektronischer Systeme. Das im Rahmen der Arbeit entwickelte modellbasierte Expertensystem Xtalk-EXPERT erlaubt auf der Basis eines mathematischen Modells die Analyse gekoppelter Leiterbahnstrukturen. Basierend auf den Ergebnissen einer intensiven parametrischen Analyse, die zugleich einen tieferen Einblick...

...DOS prompt for immediate execution. For example, to go straight to the dial tone for MCI Mail, enter the following line at a DOS prompt:

XTALK CALL MCI

Crosstalk automatically loads the MCI entry in your phone book and calls the e-mail service. Better yet, make the line a batch file (called something simple like MCI.BAT) to **reduce** keystrokes. Create a series of these batch files, each designed to run a different phone entry, to automate most of your online activities.

Jack Nimersheim...

...of unfinished

designs or for final sign-off. Analysis and extraction engines are correlated

within 5% of Star-Hspice(TM) and Star-RCXT respectively.

Astro-Xtalk and **Mars-Xtalk** enable designers to achieve signal integrity

and timing closure concurrently with accurate crosstalk (noise and delay shift) analysis and comprehensive cross-talk prevention and correction.

Crosstalk prevention techniques include track reordering based on switching-

time windows, gate sizing and **buffer** insertion to **reduce**

transition delay and

coupling capacitance. **Astro-Xtalk** generates routing constraints through

concurrent analysis and guides the detail router to correct identified crosstalk violations.

Avant!s Mars-Xtalk Design Tool Dramatically Reduces Integrated Circuit Cross Talk

PR Newswire , p615SFM047

June 15 , 1998

Language: English

Record Type: Fulltext

Word Count: 736 Line Count: 00067

Text:

FREMONT, Calif., June 15 /PRNewswire/ -- Avant! Corporation (Nasdaq: AVNT) today announced the release of Mars-Xtalk(TM), an innovative design and analysis tool to significantly reduce "design noise" in integrated circuit (IC) design.

...of signal coupling produces higher noise levels.

Noise-induced design problems need to be carefully addressed to ensure the success of VDSM design projects. Mars-Xtalk addresses noise in the following ways:

- * Analyzes the effect of coupling capacitance on the timing characteristics and functionality of the circuit.
- * Performs necessary optimization procedures to **reduce** noise.

Mars-Xtalk links directly with Apollo, Avant!s all-path, timing-driven place and route tool and integrates directly into Milkyway, Avant!s VDSM physical database.

A preview of Mars-Xtalk will be available at the Design Automation Conference (DAC), to be held in San Francisco June 15-18. The complete tool will be available in...
